- Technology and art across eras

IMPORTANT DATES

Abstract Submission

04 August 2024

Full Paper Submission

15 September 2024

Notification deadline

27 October 2024

Start of Conference

10 November 2024

End of Conference

11 November 2024

Peer Review

12 Nov – 19-Dec 2024

Publication online immediately after completion

ORGANIZERS: *Herança – History, Heritage and Culture Journal* (SCOPUS, ESCI, DOAJ co mpendex), Zhende UK Publishing

Online conference, Host Venue: China, Nanjing, online

Purpose of the Conference: Nowadays, the fields of technology and art are no longer isolated from each other; they are complex networks that are intertwined and influence each other. Augmented Reality (AR) technology makes museum exhibits come alive, Virtual Reality (VR) technology allows people to travel around the world without leaving home, and Artificial Intelligence (AI) has become a helper or even protagonist in artistic creation raising many concerns and much discussion recently. From this point of view, the rapid development of science and technology has brought new possibilities to artistic creation, and vice versa: the expression of art on the other hand promotes the development of science and technology. ICIISHTA 2024 aims to explore the intersection of technology and art, and to explore the interaction, conflicts and challenges between the two, as well as the opportunities for developments raising in the near future. The conference aims to promote cross-border collaboration between scientists and artists, to stimulate innovative thinking, explore future directions, and to contribute to building the foundations for embracing and integrating science, technology and culture in the modern society.

A selection of full papers submitted will be peer reviewed and published free of charge in the Proceedings Special Issue of *Herança – History, Heritage and Culture Journal* in December 2024
